

CLOUDKART

Billing FAQ

Billing & Payments Knowledge Base

A question-and-answer reference covering the most common billing inquiries: duplicate charges, failed payments, invoice discrepancies, unrecognised charges, currency handling, and routing guidance for agents and the chatbot.

Document Code	BIL-FAQ-2026
Knowledge Base Category	Billing
Version	3.2
Last Reviewed	June 2026
Audience	Customer Support Agents, Support Chatbot Knowledge Base
Classification	Internal — Confidential

Table of Contents

2. Failed Payments and Invoice Discrepancies	4
3. Payment Methods and Invoicing	5
4. Unrecognised Charges	6
5. Payment Restrictions	7
6. Currency and International Billing	8
7. Invoice Exports and Seat Billing	9
8. Routing Reference for Common Phrasing	10
9. Quick Reference: Billing Intent Routing	11
Appendix A: Billing Escalation Contacts	12

1. Charges and Cancellation Timing

This FAQ addresses the most common billing questions raised through support chat, email, and phone. It is intended to be retrieved directly by the support chatbot for billing-category questions that do not require a full policy lookup.

Q: Why was I charged when I thought I cancelled?

A: Cancelling stops future renewals but does not refund the current billing cycle. If a charge appears after cancellation, check the cancellation timestamp against the billing cycle end date in the Billing Console; charges that occurred before cancellation was confirmed are expected and not an error.

Q: My card was charged twice for the same order. What happened?

A: Usually caused by a network timeout during checkout that led the customer or the page to resubmit the payment. Look up both transaction IDs; if they map to the same order, this is a duplicate charge eligible for immediate reversal under the Refund Policy, Section 8.

Worked Examples

Scenario: Customer charged \$39 the day after they cancelled, and they're angry.

Resolution: Verify the cancellation timestamp and the billing date; if billing occurred before cancellation the charge is valid — explain clearly and empathetically.

Scenario: Customer's bank shows two \$12 charges on the same day from CloudKart.

Resolution: Pull both transaction IDs; if both link to the same order, reverse the duplicate immediately without requiring further review or a waiting period.

2. Failed Payments and Invoice Discrepancies

Q: My payment failed. What should I do?

A: Payment failures are usually caused by insufficient funds, an expired card, or the card issuer's fraud filter blocking the transaction. Ask the customer to verify their card details are current, then retry from Account Settings > Billing > Update Payment Method. If retries continue to fail, suggest PayPal as an alternative.

Tip for the Support Chatbot

'Payment failed' and 'card declined' queries should route to billing_faq first. If the customer reports a successful charge with no corresponding access or order, instead route to refund_policy Section 8, since that indicates an orphaned charge.

Q: Why does my invoice show a different amount than expected?

A: Most often caused by a pro-rated charge from a mid-cycle plan change, applicable tax, or a discount that expired after its promotional period ended. Always check the itemised invoice in the Billing Console before assuming an error.

Worked Examples

Scenario: Customer upgraded from Plus to Pro mid-cycle and sees an unexpected \$18 charge.

Resolution: This is the pro-rated difference for the remaining days of the cycle at the Pro rate; show the itemised invoice breakdown to confirm.

Scenario: Customer's PayPal payment fails even though they have a positive balance.

Resolution: PayPal can decline if the account is limited or if the card backing the PayPal account is expired; ask the customer to check their PayPal account status.

3. Payment Methods and Invoicing

Q: How do I update my payment method?

A: Account Settings > Billing > Payment Methods > Add Payment Method, then set it as default. The previous method remains on file unless explicitly removed.

Q: Can I get an invoice with my company's tax ID on it?

A: Yes. Tax ID and billing address details can be added under Account Settings > Billing > Tax Information. Future invoices will include this information; past invoices can be regenerated on request through support.

Q: Why was I charged sales tax this time but not before?

A: Tax is calculated based on the billing address on file and applicable regional tax law, which can change. A change in billing address or a change in local regulation can both cause tax to start or stop applying.

Worked Examples

Scenario: Customer needs an invoice with their VAT number for an EU company.

Resolution: Direct them to Account Settings > Billing > Tax Information to add their VAT number; future invoices will include it. Past invoices can be regenerated.

Scenario: Customer's monthly invoice suddenly includes €8 of VAT that wasn't there before.

Resolution: Their EU country may have updated its digital services VAT rules, or their billing address was recently updated; check the tax line on the invoice.

4. Unrecognised Charges

Q: I don't recognise a charge from CloudKart on my statement.

A: Statement descriptors sometimes differ from the brand name. CloudKart charges appear as 'CLOUDKART INC' or 'CK*SUBSCRIPTION' depending on the customer's bank. Ask for the last 4 digits of the card and the charge date, then cross-reference against the account's transaction history before assuming fraud.

Escalation Path

If no matching transaction is found anywhere on the account after verification, treat this as a potential card compromise rather than a billing question and escalate to the Security team rather than processing a standard refund.

Worked Examples

Scenario: Customer sees 'CK*SUBSCRIPTION \$39' and doesn't know what it is.

Resolution: Cross-reference with their account's billing history; if it matches their Pro renewal, explain the descriptor and show them the corresponding invoice.

Scenario: Customer sees 'CLOUDKART INC \$39' but has no CloudKart account.

Resolution: No matching account found — escalate to Security with tag billing-fraud-review; do not issue a refund unilaterally.

5. Payment Restrictions

Q: Can I split my payment across two cards?

A: No. CloudKart's checkout supports a single payment method per transaction. Customers needing to split costs internally should use a single card and reconcile separately.

Q: Do you accept purchase orders (POs)?

A: Purchase orders are accepted only for Enterprise plans through the Sales team. Standard self-service plans (Starter, Plus, Pro) require a credit card, debit card, or PayPal at checkout.

Q: How do I get a receipt for expense reimbursement?

A: All invoices are available under Account Settings > Billing > Invoice History as downloadable PDFs, suitable for expense reimbursement without additional formatting.

Worked Examples

Scenario: Customer wants to pay half from a personal card and half from a company card.

Resolution: Not supported; advise using one card for checkout and handling internal cost-splitting outside of CloudKart.

Scenario: Customer needs an invoice PDF for their employer's finance department.

Resolution: Direct them to Account Settings > Billing > Invoice History to download the PDF directly — no need to request a copy through support.

6. Currency and International Billing

Q: What currencies can I be billed in?

A: CloudKart bills in USD, EUR, GBP, and PKR based on the billing address country. Currency cannot be changed independently of the billing address since it is used for tax determination as well.

Q: Why did my converted price change between renewals?

A: For customers billed in a currency other than USD, the underlying USD price is fixed but the displayed local-currency amount can shift slightly between cycles due to foreign exchange rate updates applied at each renewal.

Worked Examples

Scenario: Pakistani customer asks why their PKR invoice is higher this month.

Resolution: The USD plan price hasn't changed, but PKR/USD exchange rates fluctuate; show the USD base price on the invoice to confirm no price increase occurred.

Scenario: Customer asks to switch billing from EUR to USD.

Resolution: Currency follows the billing address country; to switch to USD they would need to update their billing address to a USD-denominated country.

7. Invoice Exports and Seat Billing

Q: Can I get all my past invoices at once?

A: Yes — use 'Export All Invoices' in Account Settings > Billing > Invoice History, which generates a single ZIP file of all PDF invoices for the account.

Q: A removed team member was charged for their seat after removal.

A: Seat counts are calculated at the start of each billing cycle. Removing a team member mid-cycle reduces the seat count starting next cycle; it does not retroactively refund the current cycle's seat charge.

Worked Examples

Scenario: Customer wants 3 years of invoices for an audit.

Resolution: Guide them to use 'Export All Invoices' for a single ZIP download; agents do not need to email invoices manually.

Scenario: Customer removed a seat on day 2 of the billing cycle and wants a prorated refund.

Resolution: Seat changes apply at the next cycle, not mid-cycle; explain the policy and that the seat count will reflect correctly from the next invoice.

8. Routing Reference for Common Phrasing

The table below maps common customer phrasing to the correct internal category, useful for tuning the chatbot's intent classifier.

Customer Phrase Pattern	Likely Intent	Recommended Document
'charged twice' / 'double charged'	Duplicate transaction	refund_policy.pdf, Section 8
'payment failed' / 'card declined'	Failed payment	billing_faq.pdf, Section 2
'want my money back' / 'refund'	Refund request	refund_policy.pdf
'upgrade my plan' / 'change plan'	Plan change	subscription_plans.pdf, Section 4
'cancel my subscription'	Cancellation	subscription_plans.pdf, Section 6
'don't recognise this charge'	Unrecognised charge	billing_faq.pdf, Section 4

Phrase matching should be treated as a starting point, not a definitive classification. The chatbot should confirm the matched intent with a brief clarifying question before retrieving from a specific document, particularly when the customer phrasing is short or ambiguous (e.g., 'need help with my bill').

Worked Examples

Scenario: Chatbot receives: 'I have a billing problem'.

Resolution: Too vague to classify confidently; chatbot should ask 'Could you tell me more ' 'about the issue — is it related to a charge, a refund, or your plan?' before routing.

Scenario: Chatbot receives: 'Why is my invoice higher than last month?'

Resolution: Route to billing_faq.pdf Section 2 (invoice discrepancies); also check Section 3 if tax may have started applying.

9. Quick Reference: Billing Intent Routing

This quick reference is designed for the support chatbot's intent resolution layer. It maps high-frequency billing question patterns to the specific section of the most relevant document, enabling single-hop retrieval for most queries.

Intent	Primary Document	Section
Duplicate charge	refund_policy.pdf	8 – Failed and Duplicate Transactions
Failed payment	billing_faq.pdf	2 – Failed Payments and Invoice Discrepancies
Refund request	refund_policy.pdf	2–4 – Eligibility, Exclusions, How to Request
Plan upgrade or downgrade	subscription_plans.pdf	4 – Upgrading and Downgrading
Cancel subscription	subscription_plans.pdf	6 – Cancelling a Subscription
Update payment method	billing_faq.pdf	3 – Payment Methods and Invoicing
Unrecognised charge	billing_faq.pdf	4 – Unrecognised Charges
Invoice or receipt needed	billing_faq.pdf	7 – Invoice Exports and Seat Billing
Currency or tax question	billing_faq.pdf	6 – Currency and International Billing
Discount or promo code	subscription_plans.pdf	8 – Discounts and Promotional Pricing

When two categories seem to apply (e.g., a refund request that also involves a duplicate charge), prefer the more specific document — `refund_policy.pdf` for anything involving money back, `billing_faq.pdf` for account or invoice questions that don't involve returning money.

Appendix A: Billing Escalation Contacts

Internal contact points for billing escalations.

Escalation Type	Team	Ticket Tag
Suspected fraud or compromised card	Security	billing-fraud-review
Chargeback or formal dispute	Disputes	dispute-active
Orphaned or unmatched charge	Billing Engineering	payment-orphan-charge
Enterprise contract / PO	Sales	enterprise-billing
Tax exemption request	Billing Operations	tax-exempt-review
